No Warranty on Doors Inappropriately Attached to Frames

Effective immediately, Mohawk Flush Doors will no longer offer a factory warranty on doors that are not appropriately attached to a frame.

Consistent with industry standards, Mohawk requires doors to be installed with 3 hinges on all doors up to 90" (7' 6"). For doors taller than 7' 6" an additional hinge is required for every additional 30" of door height or portion thereof.

Center pivots ARE required for pivot door applications to maintain the factory warranty.

Finally, sliding door or any other applications where doors are not attached appropriately to a frame are not warranted for warp/deflection.

Mohawk manufactures products to the toughest industry standards, and only warrants doors installed in appropriate applications.
