Applied Molding Restrictions

Bifold Doors:

As a result of operating restrictions created when moldings are applied to the surface of bifold backs, Mohawk will no longer bid or build doors specified in this manner.

Additionally, bifold doors produced with applied moldings on one side only cannot be warranted for warpage.

Rustic Series Doors:

Due to the fact that the surface of this product is heavily embossed, and is not smooth the adhesion properties become compromised. As a result, Mohawk will no longer bid or build doors specified in this manner.
