

## INTRODUCING

# NEW COLORS FOR FACTORY-FINISHED PAINTED DOORS

**MASONITE.**  
ARCHITECTURAL

## Color the World

Create the visual impact of a painted door without the risk of field-applied finishes. With every factory-finished painted door, Masonite Architectural infuses color-critical design elements and unmatched quality from our professionally applied finish. Our state-of-the-art equipment ensures stunning results in every project—every time.

Unlike field finished doors, which are susceptible to color inconsistency and damage, our factory-finished doors offer superior uniformity, arrive in your selected color and are backed by a manufacturer's warranty.\* Also, factory painted doors are more eco-friendly since factory-finishing reduces potentially harmful chemical pollutants from jobsites by minimizing the amount of finish coatings that are introduced into the air.

Our factory-finished painted doors are available in the Aspiro™ and Cendura™ series with various options available to fulfill all of your architectural and commercial project needs.

\*See manufacturer warranty for details.

Our factory finished painted doors are now available in seven designer colors. Custom color-matching options are also available.

### ✓ CONSISTENCY

- Uniform color, texture and coating consistency
- Painted with state-of-the-art spray systems designed for optimal flash-drying and cooling cycles, providing greater durability than field-painted doors

### ✓ EFFICIENCY

- Expedited project completion with production scheduled factory-finishing
- Lower finishing costs, as jobsite preparation, painting and cleanup are not necessary

### ✓ RELIABILITY

- Factory-controlled environment that reduces contact with dust and dirt
- Enhanced design options afforded by reliable and repeatable factory color matching

**Beauty and consistency from factory-finishing is a key part of creating an extraordinary customer experience**

# Beautiful Doors Start at the Surface

Factory-finished painted wood doors by Masonite Architectural are available in a variety of surface materials\*\* to meet aesthetic preferences and project objectives so you can always specify with confidence.

## MEDIUM DENSITY OVERLAY (MDO)

Available in Aspiro Series

- Optimal surface for opaque finished doors
- Smooth, light colored surface material that provides excellent adhesion for factory applied finishes

## TEMPERED HARDBOARD

Available in Cendura Series

- High density, smooth surface with enhanced physical properties and no pronounced wood grain
- Offered in flush style doors

## ROUTED MEDIUM DENSITY FIBERBOARD (MDF)

Available in Cendura Series

- Solid, dense material with superior strength and durability
- Blank canvas to express unique to traditional designs

## WEST END COLLECTION®

Available in Cendura Series

- Smooth hardboard surface with embossed reveals
- Embossed insets create streamlined, modern appeal

## MOLDED PANEL

Available in Cendura Series

- Smooth hardboard with deep, rich embossments
- Raised panels in an array of design choices

\*\*Each surface material option meets the industry standard for aesthetics outlined in WDMA I.S.1A Architectural Wood Flush Doors.
